

Saxon Flexi-Fund

We'll manage your marketing
while you manage the farm

Saxon Wheat Flexi-Fund Performance
Ex-farm Price v Fund Return (£/mT)

The Saxon Wheat Flexi-Fund has performed reliably over the last 13 years.

SUCCESSFUL & SECURE MARKETING

The Saxon Flexi-Fund is a pool based product backed by 10+ years of reliable risk management and returns.

How it works

Selling your wheat, barley or oilseed rape into the Flexi-Fund means we manage the marketing of that grain on your behalf.

In return, you receive a choice of flexible payment options – Advance or Fixed – and access to a secure, agile marketing tool.

Secure backing, driven by global market insights

The Saxon Flexi-Fund is backed by Australian Securities Exchange-listed parent company GrainCorp, and has been continuously managed by Saxon Grain Director Mark Smith.

You benefit by joining a secure fund whose marketing decisions are informed by feedback, data and expertise from around the world, putting international markets within reach.

Designed for you

Our payment options build your cashflow: Fixed Payments (full payment on an exact date) or Advance Payments (a cash advance to get you through the Fund period).

Choose your crop: Funds open for wheat, barley and oilseed rape.

We reward your quality: Added quality premiums for farmers capable of growing grain grades to suit our milling or malting customers. And you can protect your milling premium through Saxon's min/max Premium Contracts.

Quality assurance: Free DON test for any milling-grade wheat.

The Saxon Flexi-Fund Advantage

- Backed by a professional trading team with global insights.
- A controlled Fund size that allows rapid response to markets and risk management strategies.
- Complete transparency of Fund-related sales at any time.
- Secure financial backing ensures you get paid on time, every time.
- Designed for you.

Saxon's 2020 crop funds are now open
